Upcoming Programs!

Dr. Zandinejad
- Discuss different restorative materials/design that are available for restoring dental implants in the esthetic zone
- Identify factors that will affect the restorative material/design selection for implants in the esthetic zone
- Discuss how to select the restorative material/design for maximizing durability and esthetics

Dr. Duplantis
- The digital landscape and the future of dentistry
- The integration of the “Pyramid of Implant Success” and who all is involved
- The importance of proper diagnostic data
- Current trends in implant restorations

Dr. Donley
- Fully understand the differences between periodontal and peri-implant diseases.
- Learn the most common causes of early implant failure and how to avoid them.
- Develop an implant exam designed to increase the chances of success.
- Learn the ideal protocol for debriding and maintaining titanium.
- Develop an implant maintenance protocol to insure implant health.
- Learn how to successfully treat peri-implant mucositis.

Recently I was at a monthly meeting and it struck me how closely knit the community of FWDDS is and how it supports, encourages, and protects its own. As I studied the room I saw colleagues, old friends, mentors, and new friends eager to share their career journey with others on the same course. There was a group of old friends who attended the same dental school joking about the good old days and how it didn’t seem that long ago. They snapped a picture for old time sake and agreed to get together again soon. Colleagues shared information, ideas, and promises to connect with others that could use their help and support. Several students from the dental school in Dallas came over to learn more about FWDDS and soon there was a contingent of new dentist surrounding them, welcoming them to the meeting. The new dentists understand the value of being connected to those who have traveled the path that the students will soon embark on.

One of the reasons why I love Fort Worth is that it is a big city with a small town heart. People are friendly and they are sincere when they ask how you’re doing. It is not uncommon to meet someone new only to find out that they are a friend of a friend, you went to the same school or you frequent many of the same places. It is easy to establish rapport and quickly welcome a new friend. These connections are woven into relationships that will influence us personally and professionally. Some will be life-long friends while others will guide us through a season of growth or change. A few will change the direction of our lives.

FWDDS too is a community of relationships. It is the one thing that makes our society unique and one of the things that I am most proud of as its president. Over the past few months we have had great attendance at our programs. While it is nice to know that dentists are taking advantage of the CE, it’s great to see the camaraderie between members.

We are seeing old friends return, dental students eager to learn more about us and people getting energized about the future of our society. There is great strength in our relationships.

FWDDS members also have relationships in the community. Many quietly and diligently serve our community in programs that benefit those who have so few options for oral health care. These dentists use their time, skills and resources to make a difference in Fort Worth and I applaud them for their service. Their commitment and support of the community strengthens the “small town heart” of the place we call home.

Don’t miss out on new patients! Update your NEW ADA Find-A-Dentist® profile.

The new Find-A-Dentist tool makes it easier than ever for patients to find you. Take 5 minutes to update your profile with the information patients look for most:

- ✔ Photo
- ✔ Business address
- ✔ Office hours
- ✔ Practice email
- ✔ Payment options
- ✔ Insurance types
- ✔ Languages spoken

To update your profile and access resources to help promote your practice, visit ADA.org/findadentist
One of the most important steps that the board of directors has taken in the last few years is to strengthen the system of committees that reinforce our district dental society. The committees operate in a variety of ways to enhance and strengthen the value of membership.

Have you ever wondered, “Who chooses the speakers for our continuing education programs?” or “How does the golf tournament happen?” An even better question is “What happens if a patient files a complaint against me or my practice? Who is there to help to resolve a situation with an upset patient and keep me out of court?” This might be the best question, “Who will help young dentists get reliable information that will guide them to smart decisions about practice growth and profitability”?

The answer to all of these questions and more is found in the cadre of volunteer dentists who serve on FWDDS committees. They use their time and talents to serve colleagues in our professional community. We have a top notch administrative team at the society office that manages the nuts and bolts duties that keep all of the gears moving in synchronicity. However, remember that membership in FWDDS is local. Local volunteer dentists - your colleagues, neighbors and friends serve at various levels on many different committees to provide peer review, help with new dentists’ issues, develop continuing education programs, serve on governmental affairs or plan fun events like the golf tournament, clay shoot, and many more.

We as a professional organization can only serve our membership and be relevant to their needs by having members directly involved.

So, why would anyone want to be on a committee? The short answer is that it can be fun. Meeting with other dentists and planning events develops relationships that you might not ordinarily have in your professional life. There is also a certain level of satisfaction that comes from contributing and creating with your peers. It is through service to others that we gain joyfulness in our own life. Henry Ford said, “There is joy in work. There is no happiness except in the realization that we have accomplished something.” There are so many ways and areas of interest in which you can participate. Find the one that appeals to you. “Human service is the highest form of self-interest for the person who serves.” Elbert Hubbard.

We need you to help FWDDS serve its members in even more ways. A small investment of your time becomes an invitation to participate in programs and activities that will impact your local professional community. The joy in cooking is in the joy in cooking for others.

Please contact Cindy Farris at the dental society office or at our next monthly meeting to sign up for your favorite committee. You can also complete, scan, and email the Service Interest Form on the opposite page to Cindy at info@fwdds.org.
Invest your Time and Talent in making a difference at the FORT WORTH DISTRICT DENTAL SOCIETY.

Here are areas where you can help:

**MEMBERSHIP:**
- **Awards**: Recommend nominees for Dentist of the Year awards and other awards that recognize members for their contributions to dentistry.
- **Constitution and Bylaws**: Maintain the Constitution and Bylaws.
- **Judicial**: Approve the eligibility of potential candidates for Society membership.
- **Retirement**: Focus on programs specifically designed for dentists approaching retirement.
- **Membership Development**: Conduct new member recruitment and retention efforts.
- **Investment Guidance**: Members who will work alongside the Board of Directors to develop short and long term investment strategies.

**LEADERSHIP:**
- **Director**: Serve in one of six positions as a liaison between the Board and membership.
- **Program Chair**: Research and recruit speakers for continuing education programs.
- **Event Committee**: Plan and organize member events.

**LEGISLATIVE / GOVERNANCE AREAS:**
- **ADA Delegate / Alternate Delegate**: Attend all meetings of the TDA delegation to the ADA House of Delegates.
- **TDA Delegate / Alternate Delegate**: Attend all meetings of the FWDDS delegation to the TDA House of Delegates.
- **Legislative Affairs**: Be informed on legislative matters relating to dentistry and keep the Board of Directors and Membership apprised of emerging trends.

**PLEASE EMAIL FORM TO:** INFO@FWDDS.ORG

A CONVERSATION WITH DR. TONYA FUQUA

Program Director – Save a Smile

FWDDS: Thank you for taking the time to speak with me about Save a Smile.
Dr. Fuqua: It is a pleasure to talk about my passion for Save a Smile and the difference the program makes in the lives of children in our community.

FWDDS: Before we start I have to admit that I don’t quite know the difference between the Children’s Oral Health Coalition and Save a Smile. Aren’t you both doing the same thing?
Dr. Fuqua: That’s a common misconception. Both are under the Center for Children’s Health at Cook Children’s, but serve different purposes. The Children’s Oral Health Coalition’s mission is to improve the oral health of children 0-8 years old in Tarrant County through community collaboration. Over 30 community partners make up the coalition with focus on increasing awareness of oral health, training community professionals on oral health basics so that they can educate families, distributing educational and prevention resources, and through legislative advocacy they are working to enhance access to dental services. Think of them as the prevention and advocacy group. Save a Smile is advocacy in action. With the help of over 80 volunteer dentists we are able to improve the health of underserved children through prevention and treatment. Our volunteer dentists provide services and treatment in their private practice to children in targeted schools at no charge. This is care that these children might not receive due to the inability of the family to pay for oral health care or even to be able to get to the treatment. Often dental problems are left untreated until they become a medical emergency.

FWDDS: How are the families connected to the volunteer dentists? Do they call Cook Children’s Hospital and ask for a referral?
Dr. Fuqua: It doesn’t quite work that way. This program is a school-based grassroots approach that includes a social service model that is the key component to connecting children to the care they need. A licensed master’s level clinical social worker manages community health workers who work in the schools with students and their families. Children receive a dental screening by a volunteer dentist to assess current and potential dental problems. Based on that assessment, severity of the issue, age of the child, translation requirements, and financial/insurance status, a referral...
There’s only one dentist for her!

We provide oral healthcare for patients with special needs.

Our facility offers a comfortable environment specifically designed to meet the needs of disabled, handicapped or challenging patients.

FWDDS: Can only pediatric dentists serve as volunteers?
Dr. Fuqua: Absolutely not! We need volunteer dentists from all specialties as well as general dentistry. Save a Smile will work with the dentists to find the right type of volunteer opportunities. Our goal is to help a child get the oral health care that he or she needs and for our volunteer dentists to feel the satisfaction of knowing that they made a difference in that child’s life.

FWDDS: How can dentists volunteer for Save a Smile?
Dr Fuqua: To learn more about Save a Smile and how to become a volunteer dentist, go to www.centerforchildrenshealth.org/en-us/Counties/tarrantcounty/saveasmile/.

Located in the unassuming Community Crossroads building on Hemphill in Fort Worth, the Salt and Light Dental Clinic isn’t what you would expect to find on the inside. Started in 2005 by the First Presbyterian Church of Fort Worth with donated chairs and equipment from retired dentists, the clinic is hope to individuals who do not have the financial resources to get the dental care they need. The clinic provides basic services such as exams, cleanings, filings and extractions. In 2017 it is through these “basics” and over 300 patient visits, people got relief from pain, improved their overall health and came away with a brighter smile.

The Salt and Light Clinic is a 501(c)3 that is operated and funded by the First Presbyterian Church of Fort Worth. They don’t accept walk-ins or call-ins but use a referral system from caseworkers at a multitude of shelters and social agencies. The caseworker will vet patient candidates before an appointment is made to see a dentist. Pat Graham who runs the clinic shared, “our waiting list is six weeks out. Often patients wait more than a month to get relief from the pain they are experiencing.”

Currently the clinic has a commitment from Dr. Kathy Hevrin for two Mondays each month. When volunteer dentists are available, Pat is able to increase the number of clinic dates and accept more patients. Typically they operate from 8:00 AM until noon with patients scheduled every 30 minutes. Several FWDDS members have served as volunteer dentists for the clinic including Dr. Amy Bender, Dr. David Mikulencak, Dr. Eric Wear, and Dr. Jessica Brigati. They, along with other dentists in the area, have worked to foster hope in a place where it is needed most.

If you would like to join the volunteer team at Salt and Light Dental Clinic contact Pat Graham via email at patg1946@gmail.com. He will be happy to share more about the clinic’s needs and how you may be able to help.

RESTORATIVE MATERIAL SELECTION FOR IMPLANTS IN THE ESTHETIC ZONE:

Today replacing missing teeth in the esthetic zone with dental implants is very common. Nevertheless for an ultimate and predictable esthetic outcome a proper restorative driven implant placement and a careful design and material selection for final restoration is essential. This presentation reviews the wide variety of restorative materials that are available for restoring dental implants in the esthetic zone. The indication and limitation for each material will be discussed form the scientific and clinical view point.

- Discuss different restorative materials/design that are available for restoring dental implants in the esthetic zone
- Identify factors that will affect the restorative material/design selection for implants in the esthetic zone
- Discuss how to select the restorative material/design for maximizing durability and esthetics

Amirali Zandinejad DDS, MSC, completed his dental training in 1996. He completed a residency program in operative dentistry and received his Master’s degree in restorative dentistry from Sheffield University in the United Kingdom. He completed his AEGD residency and prosthodontic training at the university of Rochester in New York. He is a fellow international team for implantology (ITI). He lectures extensively on implant and esthetic dentistry and has numerous publications. Dr. Zandi joined the Texas A & M University, College of Dentistry as the Director of AEGD program in 2015. He practices in Arlington TX and his practice is limited to Implants, Esthetic Dentistry and Prosthodontics.

ONSITE SHREDDING EVENT FAQS SHEET

- Action Shred will provide an onsite mobile shredding truck and staff to assist offloading boxes and material from participant vehicles to provide onsite paper destruction. Action Shred does not require any staffing support from the Event Host but welcomes it if available. Our team will arrive at the event location 30-45 minutes before the event for set up or at a time the Event Host designates.

- Our onsite truck capacity is 10,000 pounds of shredded paper or the equivalent of approximately 250 letter sized boxes. Our truck is designed to lift a 65 gallon tote to the top of the truck where it is securely dumped into the internal shredding compartment. We schedule one onsite truck for the event and our involvement ends when the event hours are over or the truck fills to capacity. We can also provide a second collection truck at an additional hourly rate to transport overflow material, cardboard and electronics back to our secure facility for offsite destruction and recycling.

- Attendance and traffic at a community shredding event can be unpredictable. At times there may be a spike in traffic and we will shred as quickly as possible to keep up. It is not uncommon to have totes filled with material or boxes of documents staged that will be shredded as we can get to them. If a participant wants to witness their material being shredded, we will honor that request if it is a reasonable amount.

- Assisting participants with moving boxes and bags of paper from their vehicles into the 65 gallon totes for shredding is performed by the Action Shred team. Unloading vehicles can take from one minute up to five minutes or more depending on the volume of material. Traffic flow is very important to keep the lines moving. Large volumes of paper or quantities of boxes will be loaded on pallets and shredded at our facility.

- Our onsite truck shreds paper only. Plastic, metal, batteries, X-rays, cell phones and CD’s are not acceptable for shredding. Also for electronics, we take only office electronics such as desktop computers, laptops, printers, faxes, copiers, monitors (except the old CRT units that look like a small TV). We will destroy the hard drives in the computers only if they are removed from the devices.

- Based on our experience, it is suggested that a box limit is advertised and adhered to. Inevitably, someone will bring an unreasonable quantity of boxes which circumvents the spirit of the event. It also slows the traffic flow and takes up significant capacity in the shredding compartment of the truck minimizing the number of participants we can accommodate. This is only a recommendation, not a requirement.

- Billing for the event begins when we start shredding, even if before scheduled event hours. If, because of the volume of material we still have boxes and electronics that must be loaded after the event hours have ended, we will bill the pro-rated time until all pallets have been loaded on the truck.

- In the event of rain or inclement weather, Action Shred will bill a minimum one-hour mobile truck rate upon arrival even if the event is cancelled prior to the start time or within the first hour. For hours that follow, the billing will be pro-rated to the half hour per truck.

THE DIGITAL MAP FOR RESTORING IMPLANTS:
SIMPLIFYING THE PROCESS

Whether we have embraced it or not, digital is the future of our profession. This condensed course will shed some light on the “digital age” of dentistry, most specifically implant dentistry. Digital workflows have simplified the process of restoring implants, and we will examine how.

Following this presentation, the attendee will have a better understanding of the following:

• The digital landscape and the future of dentistry
• The integration of the “Pyramid of Implant Success” and who all is involved
• The importance of proper diagnostic data
• Current trends in implant restorations

Dr. Duplantis received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1999. He continued with Post doctorate training at Baylor College of Dentistry, earning a certificate in Advanced Education in General Dentistry in 2000. He has also applied for, and been confirmed for his Fellowship degree from the Academy of General Dentistry this coming July.

Dr. Duplantis is a member of Catapult Educations Speakers Bureau and has been a member of several Aesthetic and Restorative Continuums, most recently the Spear Education Study Club. Dr. Duplantis has always had an interest in “high-tech” dentistry and has been incorporating CAD/CAM technology in his practice since 2004. Formerly a CEREC user, he is now a user of the 3M TrueDefinition Oral Scanner and the Glidewell Laboratories Fastmill. Dr. Duplantis has written several articles regarding digital dentistry for various dental publications and has helped 3M on various projects. Dr. Duplantis is a member of the panel of experts on the website www.TrueDefDoctors.com and a clinical consultant for Glidewell Laboratories.

“OPEN WIDE!”
(...AND HOPE NOTHING FALLS OUT.)

Full Day CE Spring Course:
Dental Implant Maintenance
Speaker: Dr. Timothy Donley

Walking past a room full of erupting laughter, I slowed down. After all, I was at a dental convention, looking for some serious knowledge. Then, the room erupted again and I had to look in. There was a packed house, standing room only, with all present thoroughly enjoying a discussion on... biofilm? You have to be a great speaker to make a discussion on the inflammatory process both entertaining and informative, and the FWDDS is excited to have this speaker for a Full Day Spring CE Course. Meet Dr. Timothy Donley...

And, yes, we’re saturated with implant courses available to us. They cover everything from what type of implant to use, how to place, how to restore, which material, sequence of treatment, digital vs. conventional, screw retained vs. cementable, Morse taper vs. Morse code...

help, I’m exhausted! However, Dr. Donley will be discussing something every dental practice that places, restores or maintains implants needs; “How to Keep Your Implants OFF of the Failure List.”

Dr. Donley is one of the best at taking the latest research and putting it into a form that we can apply to our practice the first day back to the office. From how to best debride and maintain titanium, to developing an effective implant exam, to learning the most common causes of implant failure, to how best to successfully treat peri-implant disease, this lecture has something for you and your entire team. So, put April 27, 2018 on your calendar now and come learn what to do before and after implant placement to maximize your patients’ chances of long term implant success. You and your patients will be glad you came!

By Dr. Tim Knight

HOW TO KEEP YOUR IMPLANTS OFF THE FAILURE LIST: SUCCESSFUL PREVENTION AND TREATMENT OF PERI-IMPLANT DISEASE

Peri-implant disease is a growing concern. Key differences between the disease process around dental implants compared to natural teeth make adequate maintenance of dental implants an important part of implant success. Preventing implant bone loss is possible with a carefully designed approach. Come learn what to do before and after implant placement to keep your implants healthy and functioning for the long term.

- Fully understand the differences between periodontal and peri-implant diseases.
- Learn the most common causes of early implant failure and how to avoid them.
- Develop an implant exam designed to increase the chances of success.
- Learn the ideal protocol for debriding and maintaining titanium.
- Develop an implant maintenance protocol to insure implant health.
- Learn how to successfully treat peri-implant mucositis.

Timothy Donley, DDS MSC is currently in the private practice of Periodontics and Implantology in Bowling Green, KY. Dr. Donley is a sought-after speaker whose courses are always highly rated. His forte lies in taking the latest research and packaging it in a way that makes sense. He is a lecturer with the ADA Seminar Series and has lectured worldwide. Dentistry Today recently listed him among its Leaders in Continuing Education. Dr. Donley co-authored the first-ever comprehensive textbook on ultrasonic debridement. He lectures and publishes frequently on topics of interest to clinical dentists and hygienists.

Staffing Solutions for Dental Practices

As a business owner, staffing needs can create a tremendous amount of stress. People move away, take maternity leave or medical leave, change jobs, call in sick, & take vacations; all of which can cause your entire team to be overwhelmed and the care of your patients to be compromised.

Allow us to eliminate that stress by assisting you with all of your temporary & permanent staffing needs so that your team can still function effectively, your patients still get the same consistent, excellent care they deserve, and you can focus on what you do best...... dentistry!

Dental Directions is the only dental placement service in Tarrant County to take responsibility for paying your temporary employees.

Let us maintain all of the employment records, handle any TWC issues, send W-2 forms at the end of the year, and file payroll reports; including New Hire reports for the Attorney General’s Office. You no longer have to worry about possible TWC & IRS audits!

DENTAL DIRECTIONS, Inc.

1244 Southridge Court Suite 103
Hurst, TX 76053
817-285-8600 Fax 817-285-8680

“Dan and Aaron actively marketed my practice and screened the candidates who were best suited to carry on my legacy.”
— Gus Gates, DDS

“Dan and Aaron fulfilled their commitment in selling my practice and expertly providing a process for transitioning my life’s work.”
— Robert G. Vittetoe, DDS

NEED A PRACTICE TRANSITION PLAN?
Over the past 30+ years, Lewis Health Profession Services has specialized in dental practice sales, appraisals, and transition structuring. We pride ourselves on providing ethical, confidential and experienced assistance with a very “hands-on” approach.

Call 972-437-1180 for a no-charge initial consultation or contact us at info@lewishealth.com

Practice Sales • Practice Appraisals • Transition Structuring • Opportunity Assessment • Associate Placement • Partnership Structuring
